

Pharmacy Science

New for 2019 - 2020

Competitors will no longer be required to show event guidelines at ILC. Test plan has been changed. The 3rd edition of Johnston text has been released. For information about what happens to the tests when a new edition of a resource is released, please see GRR. Time remaining announcements have been added to the test. Editorial updates and clarifications have been made to guidelines. Scholarship information has been added to the guidelines.

Purpose

To provide HOSA members with an opportunity to develop and demonstrate knowledge and skills in pharmacy careers.

Description

This event will consist of two rounds of competition. Round One will be a written, multiple choice test. Written test will measure knowledge and understanding at the recall, application or analysis levels. Higher-order thinking skills will be incorporated as appropriate. The test score from Round One will be used to qualify the competitor for Round Two, and will be used as part of the final score. The top scoring competitors will advance to Round Two for the performance of a selected skill(s) identified in a written scenario. The scenario will require the use of critical thinking skills. The performance will be timed and evaluated according to the event guidelines.

Dress Code

Competitors shall wear proper business attire or official HOSA uniform, or attire appropriate to the occupational area, during the orientation, written test and skill(s)– jeans and shorts are not acceptable. Bonus points will be awarded for proper dress.

Rules and Procedures

- Competitors in this event must be active members of HOSA-Future Health
 Professionals, in good standing at the appropriate division (secondary or
 postsecondary/collegiate). Competitors should compete in skill events at the highest
 level of their training.
- Competitors must be familiar with and adhere to the "General Rules and Regulations of the HOSA Competitive Events Program (GRR)."
- 3. The test will consist of fifty (50) multiple choice items. The test score will be used as part of the final score for the event.

Round One: Written Test Plan

Pharmacy Practice History & Practice Settings	5%
Pharmacy Law & Ethics and Safety & Infection Control	
Pharmacy Terminology & Abbreviations	10%
Dosage Formulations & Administration Routes	
Sterile and Non-Sterile Compounding	
Concentration & Dilutions	
	45%

- 4. All competitors shall report to the site of the required event orientation at the time designated. The Round One test will immediately follow the orientation. At ILC, photo ID must be presented prior to competing in each round. No proxies will be allowed for the orientation. No study materials are allowed in the room.
- 5. At the International Leadership Conference, HOSA will provide basic handheld calculators (no graphing calculators) for addition, subtraction, division, multiplication and square root for both Round One and Round Two. Check with State Advisor to determine if a calculator will be used at the State level.
- All competitors will receive two (2) 8.5x11" sheets of blank paper for use during 6. the test.
- 7. Test Instructions: The competitors will be given instructions and will be notified to start the test. There will be a maximum of 60 minutes to complete the test. Competitors should leave the testing site promptly after submitting all testing materials and evaluations.

NOTE: States/regions may use a different process for testing, to include but not limited to pre-conference testing, online testing, and testing at a computer. Check with your Area/Region/State for the process you will be using.

- 8. TIME REMAINING ANNOUNCEMENTS: There will be a verbal announcement when there are 30 minutes, 15 minutes, 5 minutes, and 1 minute remaining to complete the test.
- 9. All official references are used in the development of the written test. The specific reference selected for each Skill is listed in the Facilities, Equipment and Materials section of these guidelines.
 - Johnston, Mike. The Pharmacy Technician: Foundations and Practices. Pearson, latest edition.
 - American Academy of Allergy, Asthma, and Immunology. Symptoms and Diagnosis tab (as posted as of September 1, 2018) .https://www.aaaai.org/conditions-and-treatments/allergies/drug-allergy
 - McCartney, Lisa. Sterile Compounding and Aseptic Technique: Concepts, Training, and Assessment for Pharmacy Technician, latest edition.
 - Moini, Jahangir. The Pharmacy Technician: A Comprehensive Approach. Cengage Learning, latest edition.
- 10. The test score from Round One will be used to qualify the competitor for Round Two. The skills approved for Round Two for this event are:

Skill I: Patient Screening for Pharmacist Consultation and Services

(4 minutes)

Skill II: Verifying Controlled Substance Prescription Content

and DEA Number

(6 minutes)

Skill III: Withdrawing Liquid from a Vial

(15 minutes)

Skill IV: Compounding an Oral Suspension

(15 minutes) Page 2 of 26 Skill V: Identifying Equipment (Including name of instrument and purpose or use) (15 minutes)
Skill VI: Filling A Prescription (5 minutes)
Skill VII: Aseptic Garbing, Hand Washing and Gloving (10 minutes)

- 11. States/National HOSA have the option of including Skill VI: Identifying Equipment and Skill II: Verifying Controlled Substance Prescription Content and DEA Number, at the same time as the Round One written test.
- 12. The selected Skill(s) for Round Two, in the form of a written scenario, will be presented to the competitor at the start of the skill(s) to be performed. One or more skills may be combined in the scenario. The scenario will be the same for each competitor and will include a challenging component that will require the competitor to apply critical thinking skills. A sample scenario can be found here.
- 13. The scenario is a secret topic. Professional ethics demand that competitors DO NOT discuss or reveal the secret topic until after the event has concluded. Violation of the ethics rules will be severely penalized per the GRRs.
- 14. In case of a tie, the highest test score will be used to determine the rank.
- 15. Competitors must complete all steps of the skill listed in the guidelines even if the steps must be simulated/verbalized. Steps may NOT be simulated/verbalized when the equipment/materials are available.
- 16. The competitor must earn a score of 70% or higher on the combined skill(s) of the event (excluding the test and ID equipment) in order to be recognized as an award winner at the ILC.
- 17. The timing for the skill will begin when the scenario is presented. Competitors will be stopped at the end of the time allowed for the selected skill(s).
- 19. HOSA offers numerous scholarships every year to its members interested in pursuing a variety of health careers. As you consider participating in this competitive event, please keep in mind there may be a HOSA Scholarship offered that fits your interests! For more information on the HOSA Scholarship program, please visit http://www.hosa.org/scholarships.

Compe	etitors Must Provide:
	Two #2 lead pencils with eraser
	Ink pen
	Shoe covers
	Face mask
	Hair cover
	Beard cover (if appropriate)
	Hair Tie to pull back long hair (if appropriate)
	Sterile non-shedding gown with snug-fitting cuffs
	Eye shields or goggles
	Sterile, powder-free, latex free gloves
	Watch with second hand (optional-Round Two only)
	A photo ID

FOR SPECIFICS ON EVENT MANAGEMENT SEE MANAGING COMPETITIVE EVENT

Require	ed Personnel	
	 One Event Manager per event One Judge Manager (JM) to provide quality assurance for the event by ensuring that the guidelines are followed and all event documents are complete. 	
	One Section Leader per section	
	One judge per skill selected per section	
	 □ Proctors for Testing – Approximately one proctor for 20 competitors □ One-two event assistants per section 	
	☐ Patients/actors as required by the scenario	
	☐ Holding room attendants(s)	
	☐ Timekeepers (if necessary)	
Faciliti	es, Equipment and Materials (Per Section)	
Round	,	
	☐ List of competitors for check-in	
	☐ One pre-numbered test per competitor	
	□ Scantron/answer forms- one copy per competitor□ Blank paper (2 sheets per competitor)	
	☐ Calculator (one per competitor)	
	□ Evaluation forms- competitor and event personnel	
	#2 lead pencils with eraser to complete evaluations (event personnel)	
Round	Two Skills: General	
	☐ Clinical and/or laboratory stations for selected skills (see <u>HOSA Room Sets</u>)	
	☐ Holding rooms or areas for competitors (if off-site)	
	☐ List of competitors for check-in	
	☐ Written Scenario-copies for judges, section leaders	
	□ Actor and judge scripts as needed□ #2 lead pencils (judges & evaluations)	
	☐ Stopwatch(s)	
	□ Rating sheets - one per judge per competitor	
	☐ Evaluation forms-competitor, judge, event personnel	
	☐ Copy of guidelines for judges	
	☐ Hand sanitizer (alcohol based handrub)	
	☐ Blank paper (2 sheets per competitor)	
	☐ Calculator (one per competitor)	
Skill I	Patient Screening for Pharmacist Consultation and Services (Reference: All)	
	☐ Scenario explaining which screening(s) are to be done	
	Copies of the screening checklist identified in the scenario (judges will use during rating of	
	competitor – found on pages 9-13 of the guidelines) ☐ Patient/actor	
Skill II	Verifying Content of a Controlled Substance Prescription and DEA Number (Reference: Johnst	on)
	☐ Scenario (must include the prescription to be verified)	,
	☐ Prescription Verification Form (one per competitor – found on page 15 of the guidelines)	
	□ Sample controlled substance prescription with DEA number	

The prescription should include 5 missing items from the list of those required.
 Competitors are asked to identify the missing components.

Transport vehicle (stainless steel cart, basket or tray to facilitate transfer) Hood (can be simulated – large enough to comfortably work under) Wipes for cleaning the transport vehicle and supplies Alcohol preps / swabs Vial to be used Vials to serve as distractors Syringe and needle of correct size Directions for drug and amount to be withdrawn (scenario) Biohazard container (puncture proof) Alcohol-based hand sanitizer Wastebasket (large enough for all competitors' gowns and paper from supplies) Stopwatch Adjustable height chair OR adjustable height table (skill can be done either sitting or standing depending on competitor's preference). One of the two (chair or table) will be adjustable so competitor may set up work area as desired. Scrap paper and pencil (for competitor to use for calculations, if needed) Skill IV Non-Sterile Compounding: Preparing an Oral Suspension (References: McCartney) Smarties candy 'tablets' or easily crushable demo dose drugs in Rx vials WITH LABELS that include drug name, tablet strength, lot number, expiration date) Completed recipe or formula using Master Formula Sheet (page 21 of guidelines) per scenario Prescription order for oral suspension Small Mortar and pestile Small bottle of suspending vehicle WITH LABELS that include agent, lot and expiration date (such as VersaFree by Humco) Liquid medication bottle as indicated by scenario information Labels to serve as distraction Auxiliary Labels (Shake well, Refrigerate, Take with Food, Use By, etc.) Counting trays Spatula for counting tablets on tray Assorted graduated cylinders Bottle brushes (for cleaning graduated cylinders) Sink, paper towels, and soap for equipment cleanup and handwashing Alcohol based hand sanitizer Transport vehicle (stainless steel cart, basket or tray to facilitate transfer) Scrap paper and pencil (for competitor to use for calculations, if needed) Skill V Identifying Pharmacy Instruments/Equipment (Reference: Moini) Scripp paper and penci	Skill III S	Sterile Compounding: Withdrawing Liquid from	a Vial (References: Johnston, Moini, McCartney)

Event Flow Chart

Sample Round One Test Questions

- 1. The Harrison Narcotics Act of 1917 was passed to:
 - A. enforce New Drug Applications with the FDA.
 - B. to regulate the dispensing of drugs. .
 - C. stop the recreational use of opium
 - D. create classifications of prescription drugs.
- 2. The newest forms of insulin were produced by ______ source.
 - A. animal
 - B. mineral
 - C. synthetic
 - D. genetic engineering
- 3. A patient is to receive 1 ounce of an over the counter medication. How many tablespoons should be given?
 - A. 1 tablespoon
 - B. 2 tablespoons
 - C. 4 tablespoons

D. 6 tablespoons

PHARMACY SCIENCE

Competitor #: _____ Judge's Signature:_____

Skill I	Patient Screening for Pharmacist Consultation and Services (Time: 4 minutes)	Pos	sible	Awarded
1.	Greeted patient and introduced self.	1	0	
2.	Provided patient privacy by verbalizing or moving to a private area.	1	0	
3.	Recorded patient's name and date of birth of the blank screening form to verify patient.	2	0	
4.	**Asked patient to respond to all questions (5 total) related to screening (as identified in scenario).			
	 Judge verifies correct questions are asked using screening checklist (student must memorize questions as they will not have access to questions at the event). 1 point given per correct question asked: questions do not have to be asked in order 	5 4 3	3210	
5.	Demonstrated NO distracting elements of nonverbal communication including lack of eye contact, inappropriate facial expressions and body position such as closed posture.	2	0	
6.	Avoided the use of medical jargon during discussion with patient.	1	0	
7.	Spoke with appropriate volume, pitch, inflection, pronunciation and diction.	1	0	
8.	Actively listened and did not interrupt while patient was speaking.	1	0	
9.	Questioned the patient as needed to ensure that responses were completely understood.	1	0	
10.	Signed the Patient Screening form.	1	0	
11.	Referred patient to the pharmacist for counseling.	5	0	
12.	Handed the completed Patient Screening form to the Pharmacist (judge) indicating the skill is complete.	2	0	
13.	Appropriate verbal and nonverbal communication with patient and other personnel.	2	0	
TOTA	L POINTS SKILL I	2	25	
70% N	lastery for Skill I = 17.5			

^{**} Step #4: Competitors should ask the patient the questions outlined in the screening checklists on the following pages 9-13 that are applicable to the screening (vaccination x3, late refill, or drug allergy) listed in the scenario received at the time of competition. To prepare, competitors should memorize all 5 questions on each of the 5 screening checklists so they can adequately ask the patients the correct questions.

Skill I Patient Screening for Pharmacist Consultation and Services

Screening Checklist for Contraindications to Injectable Influenza Vaccination

For patients (both children and adults) to be vaccinated: The questions asked are developed to determine if the requested vaccination should be given. If you answer "yes" to any of the following questions it, it does not necessarily mean the vaccination will not be given. Additional information will be required.

- 1. Is the person to be vaccinated today showing any signs of illness?
- 2. Does the person to be vaccinated have allergies to any component of the vaccine?
- 3. Is the patient over the age of 65 resulting in the need for CDC recommended higher dose?
- 4. Does the person have a severe allergy to chicken eggs?
- 5. Is the person to be vaccinated younger than 6 months of age?

Reference: Moini, Jahangir. The Pharmacy Technician: A Comprehensive Approach. Cengage Learning, latest edition.

Skill I Patient Screening for Pharmacist Consultation and Services

Screening Checklist for Contraindications to Injectable Inactivated Poliovirus Vaccination

For patients (both children and adults) to be vaccinated: The questions asked are developed to determine if the requested vaccination should be given. If you answer "yes" to any of the following questions it, it does not necessarily mean the vaccination will not be given. Additional information will be required.

- 1. Does the person to be vaccinated have allergies to any component of the vaccine?
- 2. Is the person to be vaccinated today immune depressed in any way?
- 3. Does the person to be vaccinated live with anyone who has an immune deficiency disease?
- 4. Is there a suspected familial immune deficiency?
- 5. Is there possibility that the person being vaccinated is pregnant?

Reference: Moini, Jahangir. The Pharmacy Technician: A Comprehensive Approach. Cengage Learning, latest edition.

Skill I Patient Screening for Pharmacist Consultation and Services

Screening Checklist for Contraindications to Injectable Rubella Vaccination

For patients (both children and adults) to be vaccinated: The questions asked are developed to determine if the requested vaccination should be given. If you answer "yes" to any of the following questions it, it does not necessarily mean the vaccination will not be given. Additional information will be required.

- 1. Does the person to be vaccinated have allergies to any component of the vaccine?
- 2. Is the person to be vaccinated today immunosuppressed?
- 3. Is the person being vaccinated receiving corticosteroids?
- 4. Has the person being vaccinated been diagnosed with tuberculosis?
- 5. Is there possibility that the person being vaccinated is pregnant or attempting to become pregnant?

Reference: Moini, Jahangir. The Pharmacy Technician: A Comprehensive Approach. Cengage Learning, latest edition.

Skill I Patient Screening for Pharmacist Consultation and Services

Screening Checklist for Late Refill

Promoting compliance with prescribed medication is an important role of the pharmacy staff. If the patient is not taking medication as prescribed the following questions may help determine the cause of noncompliance.

- 1. How did the prescriber recommend you take this medication?
- 2. What methods do you use to help remember to take your medication?
- 3. What side effects have your experienced with the medication?
- 4. Do you believe the medication helps resolve the issues for which it was prescribed?
- 5. What are your concerns regarding taking this medication?

Reference: Johnston, Mike. The Pharmacy Technician: Foundations and Practices. Pearson, latest edition.

Skill I Patient Screening for Pharmacist Consultation and Services

Screening Checklist for Possible Allergic Reaction

Allergic reactions can be life threatening. Concerns expressed by patient must be investigated. The following questions should be asked to obtain basic needed information.

- 1. What medication where you taking when you noticed symptoms of concern?
- 2. Please describe your symptoms.
- 3. When did your symptoms begin?
- 4. Were any other medications taken during this time, including over-the-counter drugs?
- 5. Have you stopped taking the medication?

Skill I Patient Screening Form for Pharmacist Consultation and Services

This form is given to the competitor during the event. The competitor completes this form as they ask the patient the 5 questions they have memorized for the selected screening checklist. As the competitor asks each question, the competitor should write a note of which question they asked (such as allergies, side effects, methods, concerns, immunosuppressed, etc.) in the blank space provided below. As the patient answers each question, the competitor should check "yes", "no", or "don't know" according to how the patient responds. After asking the 5 questions, the competitor will sign the form (in the form completed by line) and then return it to the judge (Pharmacist) as the final step in the skill.

Screening Checklist for:

Skill II: Verifying the Content of a Controlled Substance Prescription and DEA Number (6 minutes)

*** Via the event scenario, the competitor will be given a prescription. Each competitor will also be given a Prescription Verification Form which acts as the rating sheet (page 15 of the guidelines). The prescription in the scenario will have missing information. Competitors must know all the required components (below) of the prescription in order to identify which components are missing. The Prescription Verification Form will be scored by the judges using the points indicated.

When verifying a Controlled Substance Prescription with DEA Number, the below list of items must all be verified.

- 1. Patient Information
 - a. Name
 - b. Address
- 2. Prescriber Information
 - a. Name
 - b. Address
 - c. Telephone Number
 - d. License Number
- 3. DEA Number
 - a. Verified the second letter corresponds to the first letter of the provider's last name
 - b. Added the first, third, and fifth digits of the DEA number.
 - c. Added the second, fourth, and sixth digits of the DEA number. Double the sum.
 - d. Added the sum of b and c.
 - e. Verified that the last digit from step d matches the last digit of the DEA number.
- 4. When prescribed
 - a. Month
 - b. Day
 - c. Year
- 5. Drug name and strength
- 6. Dose and quantity
- 7. Route of administration
- 8. Directions (signature or "Sig")
- 9. Number of refills authorized
- 10. Product selection was permitted
- 11. Prescriber's signature
- 12. No dangerous abbreviations, acronyms, or symbols are used from the Joint Commission's "Minimum" Do Not Use list and Joint Commission's "Recommended" Do Not Use List.

Competitor #:	Judge's Initials:

Please list which 5 components are missing from the p	rescription given to you (below):
1	(3 points)
2	(3 points
3	(3 points
4	(3 points)
5	(3 points)
1	(1 point)
5	(1 point)
Are there any dangerous abbreviations, acronyms, or s Commission's "Minimum" Do Not Use list and the Joint Use List? If yes, list below. If no, write NO (3 points)	

What other actions are needed or required?	(2 points)
Total Points Possible: 28	Total Points Awarded:
70% Mastery for Skill II: 19.6	

Competitor #:	Judge's Signature:	
*Name brand and generic names	s will be used in the scenarios.	

Skil	Skill III: Withdrawing Liquid from a Vial (Time: 15 minutes)			Awarded
1.	Obtained the medication order.	1	0	
2.	Obtained needed supplies.	2	0	
3.	Performed calculation based on scenario.	2	0	
4.	Competitors verbalize that all anteroom preparations have been completed.	2	0	
CLE	AN ROOM PROCEDURE			
5.	Verbalized cleaning the hood.	1	0	
6.	Removed the following from the transport vehicle - vial, needle, syringe, and alcohol swabs and placed in the outer 6-inch zone of the hood.	2	0	
7.	Moved the vial into the DCA (direct compounding area) portion of the hood.	1	0	
8.	Removed the flip-top cap from the vial and placed it in the discard pile (opposite side of the outer 6-inch zone of the hood) and placed the vial in the DCA area.	2	0	
9.	Picked up an alcohol swab and placed in the DCA area. Opened & discarded swab package in discard pile.	1	0	
10.	Swabbed top of vial and placed swab in discard pile	1	0	
11.	Brought the syringe into the DCA area and removed the outer wrapping without touching or shadowing the syringe tip. Disposed of syringe wrapper in discard pile.	1	0	
12.	Opened a sterile alcohol swab and placed on the work surface of the hood and discarded of wrapper in discard pile.	1	0	
13.	With syringe in the dominant hand, opened needle and held by the cap.	1	0	
14.	Removed cap (if present) from syringe and placed in discard pile.	1	0	
15.	Held the syringe in the non-dominant hand. Used the dominant hand to pull the plunger syringe to draw equal or slightly less than required amount of air into the syringe.	2	0	
16.	Used the dominant hand to grasp the syringe at the barrel. Used the non-dominant hand to remove the needle cap and placed the cap on the alcohol swab on the hood's work surface.	2	0	
17.	Used the fingers to rotate the barrel of the syringe so that the bevel of the needle is pointed toward the ceiling.	2	0	

18.	Inserted the needle into the vial using a slight upward rotation of the wrist, keeping the needle in contact with the vial's rubber top throughout.	1	0	
19.	Inverted the vial using a clockwise motion and injected air into the vial.	1	0	

Items	s Evaluated	Possible	Awarded
20.	Removed slightly more than the desired dose and moved bubbles to the top by bracing syringe against palm and tapped the barrel of syringe.	1 0	
21.	Pushed the plunger on the syringe to expel air and any extra fluid back into the vial.	1 0	
22.	Returned the vial (with syringe attached) to the work surface using a counterclockwise motion and gently pulled syringe and needle from the vial.	1 0	
23.	Carefully recapped the needle using the scoop method.	2 0	
24.	Placed the completed product on transport vehicle.	1 0	
25.	Requested pharmacist (judge) to verify the product.	2 0	
26.	Disposed of waste from discard pile and returned equipment to appropriate location.	1 0	
ANTE	ROOM		
27.	Returned any remaining supplies to their proper location.	1 0	
28.	Verbalized removed sterile gown and gloves and remaining PPE and discarded appropriately.	1 0	
TOTA	AL POINTS – SKILL III	38	
70 % l	Mastery for Skill III = 26.6		

^{**}If a student jeopardizes the patient's or his/her own safety and does not take immediate action to correct the error, the total points for the skill or specific subpart(s) of the skill will be deducted.

Competitor #:	Judge's Signature:	
*Name brand and generic names w	vill be used in the scenarios.	

Skill IV	/: COMPOUNDING AN ORAL SUSPENSION (Time: 15 minutes)	Possible	Awarded
1.	Obtained the completed recipe or completed formula via scenario using the Master Formula sheet.	1 0	
2.	Checked the prescribed dosage with the pharmacist (judge).	2 0	
	Verified the obtained the correct number tablets needed for compounding based on Master Formula sheet and notified the pharmacist (judge). The verified accuracy. Competitor proceeds either way. Points only sed if the correct number of tablets were obtained.	2 0	
4.	Obtained needed equipment	1 0	
5.	Used alcohol-based hand sanitizer for hand hygiene.	1 0	
6.	Donned sterile, powder-free gloves.	1 0	
7.	Triturated or reduced to a fine powder by using mortar and pestle.	1 0	
8.	Added a small amount of suspending vehicle to levigate or grind the powder until a smooth paste is formed.	1 0	
9.	Continued to add suspending vehicle until product is liquid enough to transfer to a graduated cylinder.	2 0	
10.	Poured the liquid into a graduated cylinder.	1 0	
11.	Rinsed mortar several times with suspending vehicle and added to product in graduated cylinder.	1 0	
12.	Verified the amount of the suspension at eye level.	2 0	
13.	Poured the compounded suspension into medication bottle.	2 0	
14.	Selected the appropriate label from those provided and affixed to the medication bottle. *Judge verified accuracy.	2 0
